

## Mon-OxiScav

Mon-OxiScav is a non-sulfite oxygen scavenger blend used to minimize the corrosive effects of soluble oxygen. Dissolved oxygen can be removed from drilling and completion fluids. Mon-OxiScav works in conjunction with inhibitors, other scavengers and biocides to minimize corrosion and avoid damage to drilling and completion equipment.

- Rapid removal of dissolved oxygen from drilling and completion fluids
- Compatible with fresh water, mono- and divalent brines
- Used as part of corrosion control systems
- Effective at low concentrations
- Safe and easy to use
- Organic product, no solid salts are added

Technical Data	Typical Properties
Appearance	Liquid
Color	Dark
Specific Gravity	1.02 ± 0.03
Solubility in water	Soluble
Dosage recommendation	As required

**Packaging: 200 L drums, 19 L Pails.**
